The Board discussed that we would need an estimate from our engineer for what it would cost for engineering to get the City of Thorndale 250-500 GPM extra. We then could contact the City of Thorndale with that estimate and request that they assist with the cost of engineering before moving forward. Mr. Worley requested that when the engineering estimate is received that he is contacted so he can discuss it with the Board. If the Board agrees, we can move forward with notifying the City of Thorndale by sending them a letter; Mr. Worley would like to review the letter before it is sent. The Board reviewed and discussed the water rate history, the 3-year average that is recommended by the Rate Specialist and the 5-year average. The rate can only be changed in the month of March. The 3-year average is calculated at \$2.89 / 1,000 gallons. Motion made to accept the 3-year average of \$2.89 / 1,000 gallons as recommended by the Rate Specialist formula made by Ricky Stewart, seconded by Thomas Nelson – motion passed.*
